MEMORANDUM FOR: Mr. Joseph R. Carlon  
Assistant Director, Office of Protective Research  
United States Secret Service

SUBJECT: Acquisition of Excess ADP Equipment

REFERENCE: Memo for Director of Information Technology from  
Mr. Carlon, dated 6 March 85, Same Subject

1. I am pleased that the meetings between our organizations have gone well and that the knowledge and experience shared has been beneficial to your ADP efforts.

2. As a result of these meetings, your organization gained some knowledge of our potential equipment surplus and subsequently requested that we consider turning over certain pieces of these equipments to you. This request for excess ADP equipment has been reviewed and a 3033 processor was identified that fits your requirements. A representative of CIA's Office of Logistics will be in contact with your organization to arrange for the transfer of the hardware.

3. In addition, now that CIA is aware of your interest, we will keep your organization in mind as a possible recipient as equipment is excessed. Your contacts in the future will be Mr.

and

Deputy Director of Information Technology

1106

SUBJECT: Acquisition of Excess ADP Equipment

MEMORANDUM

TO : William F. Donnelly  
Director - Office of Information Technology  
Central Intelligence Agency

FROM : Joseph R. Carlon  
Assistant Director  
Office of Protective Research

SUBJECT : Acquisition of Excess ADP Equipment

MAR 16 3 37 PM '85

STAT This memorandum is to express my appreciation to members of your staff, especially [redacted] for the opportunities given to members of our data processing organization to meet with your staff. The purpose of these meetings was to discuss our future plans and to learn about some of the experiences of your staff in related areas.

Several meetings have taken place which have been extremely helpful to our staff in analyzing various alternatives that are available to us, and have uncovered new options that we were not previously aware existed. Our people were extremely impressed with the technological advances that have been achieved in your organization, and with the seriousness and dedication exhibited by members of your staff toward their areas of responsibility.

One of the outcomes of those meetings was an awareness that your agency is in the process of excessing some mainframe computer hardware which may fit into our plans for expansion of our processing capability. We are interested in acquiring as close to state-of-the-art IBM hardware as is available, and we understand that your agency plans to excess a model 3033 processor in the near future. We also understand that further plans may call for the release of newer model 308x hardware.

We would like to make necessary arrangements with your agency to be kept advised of your plans to excess equipment, and to discuss the possibilities of holding equipment for us until we can put together a reasonable plan to justify the acquisition through appropriate channels. If the 3033 processor is the only available hardware that you are contemplating excessing, we would be interested in the possibility of acquiring it once we can locate the necessary environmentally-prepared space to house it. However, the 308x hardware is much more desirable from our standpoint, if you can accurately predict its availability. Additionally, if you contemplate the release of current model tape and/or disk storage devices that can be configured with the referenced processors, we would also be interested in arranging a transfer.

- 2 -

Once again, thank you for your cooperation in sharing experiences with us. We are hopeful that this kind of sharing can continue to take place.

Joseph R. Carlon

NOTE FOR: D/OIT

SUBJECT: Attached Memo

EXDIR recently attended an IBM conference and was collared there by the owner of the card attached below.

Apparently the Secret Service has lost funding and would appreciate any help we could give them in the ADP equipment arena.
